

# Water Quality Report Notification

# 2005

# 32 Straight Years of Quality and Compliance

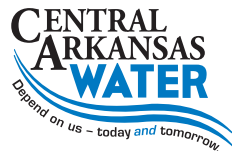

## Water Quality Report Notification

Your *2005 Annual Water Quality Report* from Central Arkansas Water (CAW) will arrive in the mail during the month of June. It will contain important information about the quality of your drinking water.

2005 marked the 32nd straight year that your drinking water supplier has met all standards for health and safety. In fact, did you know the water CAW delivers to the tap of your home, business, or industry is of a better quality than required by federal and state law?

The U.S. Environmental Protection Agency and Arkansas Department of Health & Human Services require that you receive the yearly *Water Quality Report*, under the Consumer Confidence Rule of the federal Safe Drinking Water Act. We gladly comply with this law because we know that consumer confidence begins with us.
