

April 2008

LITTLE ROCK
FIRE DEPARTMENT

CITYWIDE

Fire Hydrant

TESTING/INSPECTION SCHEDULE

In April, the Little Rock Fire Department, in coordination with Central Arkansas Water, will be testing public fire hydrants within the city limits of Little Rock. Some customers may notice discolored water during the testing.

Testing and inspections will begin Tuesday, April 1, and continue each week through Wednesday, April 30. To pose as little inconvenience as possible to residents and businesses, Fire Department crews will conduct the tests during daylight hours in a different geographical quadrant of the City.

**CENTRAL
ARKANSAS
WATER**

Depend on us - today *and* tomorrow.

City of Little Rock's Firefighting System:

- **6,807 fire hydrants**
- **391 uniformed and 6 civil personnel**
- **23,803 fire and other emergency responses in 2007**

The Fire Department conducts fire hydrant tests twice a year — April and October — to ensure the fire hydrants are operating properly and can be used in the event of a fire or other emergency that requires water.

- **Inspections involve the increased flow of water from fire hydrants, and some customers occasionally may notice discolored water during the process.**
- **Check for discolored water in your washing machine before washing clothes during the designated flushing period in your area.**
- **DO NOT WASH clothing in discolored water. The water is bacteriologically safe but may stain clothing.**

For information on when Fire Department crews will be testing in your area, please, see the schedule and map on the inside of this brochure.

Fire Hydrant Testing Schedule for April 2008:

(Map on inside of this brochure)

AREA 1	April 1 - 7
AREA 2	April 8 - 14
AREA 3	April 15 - 21
AREA 4	April 22 - 28
Make-up days	April 29 - 30

We cannot provide the exact day of the week that firefighters will be testing in your area; however, we test only during the daytime and will test in each geographical quadrant during the week designated.

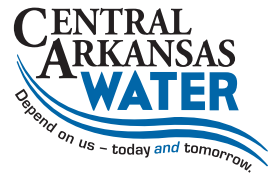

If you have discolored water for more than an hour, contact Central Arkansas Water's Dispatch Center at 501.377.1239.

Central Arkansas Water and the Little Rock Fire Department are responsible for the maintenance of public fire hydrants within the city limits of Little Rock. The Fire Department conducts the inspections and the water utility makes needed repairs.

For more information about the testing schedule, please, call Central Arkansas Water at 501.377.1224 or the Fire Department at 501.918.3700.
