

City of Little Rock Fire Hydrant Testing

Chief Gregory L. Summers
LITTLE ROCK FIRE DEPARTMENT

The Fire Department in coordination with Central Arkansas Water conducts fire hydrant tests twice a year — in April and October — to ensure the fire hydrants are operating properly and can be used in the event of a fire or other emergency that requires water.

- The increased flow of water from the fire hydrants during testing occasionally can result in discolored water at the customer's tap.
- The discolored water is bacteriologically safe but can stain clothing.
- **DO NOT WASH** clothing in the discolored water. Check for discolored water in your washing machine before washing clothes during designated fire hydrant testing periods for your area.

For information on when Fire Department crews will be testing in your area, see the schedule and map below.

AREA 3 April 8 – April 14

The area of the City of Little Rock roughly bounded by the Arkansas River on the north, University Avenue on the east, 28th Street on the south, and the city limits on the west.

AREA 4 April 15 – April 21

The area of the City of Little Rock west of University Avenue, area south of 28th Street, and all of Southwest Little Rock (area includes Broadmoor Subdivision and UALR campus).

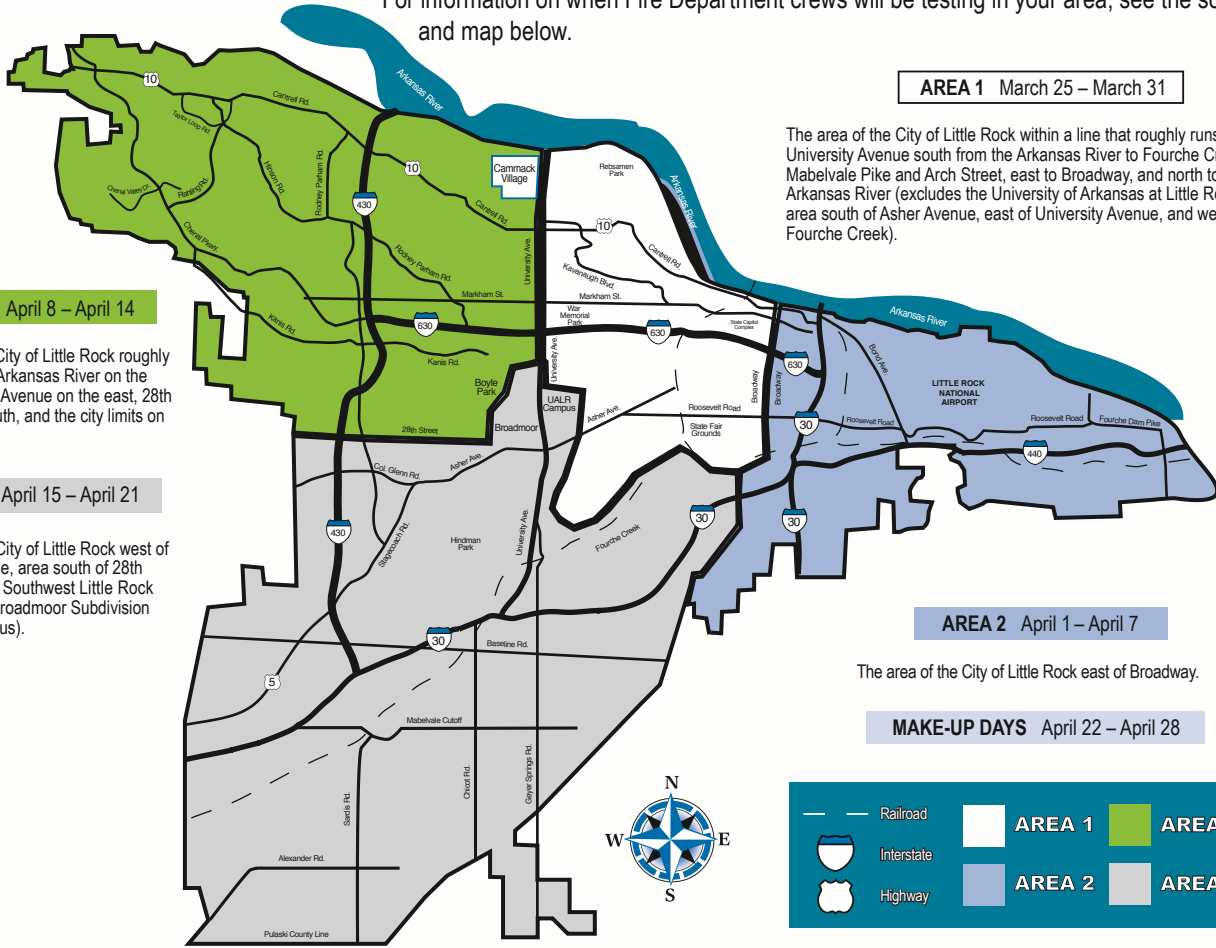

AREA 1 March 25 – March 31

The area of the City of Little Rock within a line that roughly runs along University Avenue south from the Arkansas River to Fourche Creek at Mabelvale Pike and Arch Street, east to Broadway, and north to the Arkansas River (excludes the University of Arkansas at Little Rock and area south of Asher Avenue, east of University Avenue, and west of Fourche Creek).

AREA 2 April 1 – April 7

The area of the City of Little Rock east of Broadway.
